A half size (3u) PCI expansion card that enables a computer equipped with a CD-ROM drive to play CD-i titles (including Digital Video, VideoCD and MPEG-1 files) at 30 frames per second using full motion MPEG video, in millions of colors, and with full interactive control. Over 1,000 existing CD-i titles and movies can be viewed directly on the computer's monitor (PC) or output in RGB, PAL and NTSC to an external monitor or television set. **Features include:**

- Displays directly on computer's VGA monitor (PC)
- Supports any CD-i compatible CD-ROM drive
- Allows integrated access to host computer devices such as the local hard disk or remote files over Ethernet
- MCI drivers for interfacing to third party software
- No jumper or hardware settings.

The Media Playback Professional (PC) will also function in a live video capture mode accepting PAL or NTSC CVBS from one of four separate video sources (Camcorder, VCR, Laser Disk, Video Camera, etc.).

TECHNICAL SPECIFICATIONS:
